Corporate strategy

Strategy underpinned by **three achievable objectives**

<p>1 Ekati operations <i>During Burgundy's due diligence period, several areas of improvement were identified</i></p>	<ul style="list-style-type: none">✓ Mine life additions – multiple conventional open pit and underground options are being explored to support significant mine life extension✓ Operational improvements – various opportunities have been identified to improve efficiency and reduce costs✓ Re-configuring surety arrangement to improve cash flow
<p>2 Downstream <i>Leverage vertical integration model</i></p>	<ul style="list-style-type: none">✓ Maximise margins through the Company's internal sorting, cutting and polishing facilities✓ Opportunities to optimise the rough diamond inventory cycle✓ Various innovative opportunities being explored to enhance diamond sale processes
<p>3 M&A <i>Identify new opportunities</i></p>	<ul style="list-style-type: none">✓ Ekati is the foundational asset in Burgundy's aim to become a multi-mine, tier 1 producer and a meaningful player in the global diamond industry

Section 2: Burgundy's business model

Vertically integrated business model

Burgundy can generate substantial added value downstream from only a **handful of special diamonds**

Vertically integrated business model

Diamond value chain

Ekati delivers significant rough diamond production including **highly sought-after fancy-coloured stones** (mainly yellow) that can be cut and polished in Burgundy's commercial facilities in Perth and sold to customers, allowing Burgundy to capture margins along the diamond value chain

Section 3: Overview of Ekati Diamond Mine

Canada's premier diamond mine

Ekati is a globally significant, tier 1 asset in a low-risk jurisdiction

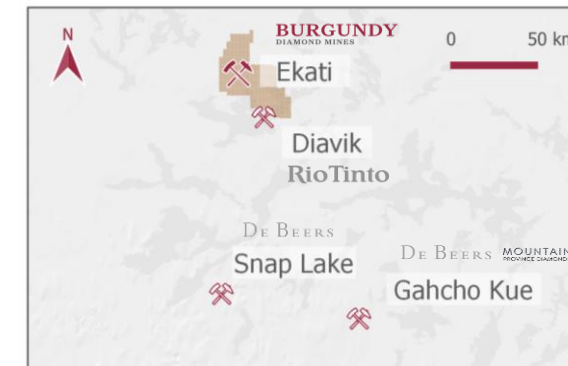

Mine overview

- Ekati is Canada's first surface and underground diamond mine
- Located near Lac de Gras, ~300 kilometers northeast of Yellowknife and ~200 kilometers south of the Arctic Circle in the Northwest Territories of Canada
 - mining lease block comprises 121 mining leases, covering an area of ~113k hectares
 - mining activities are conducted year-round
 - discovered 177 kimberlite pipes to date¹

History of Ekati

- **1981:** Exploration and development work commenced
- **October 1998:** Ekati delivers first rough diamond production under BHP Billiton (**BHP**) ownership
- **April 2013:** Following a decision to divest several 'non-core' assets and focus on its large iron ore, petroleum, and coal operations, BHP sells Ekati to Dominion Diamonds ULC (**Dominion**) for US\$553m²
- **November 2017:** The Washington Companies (**Washington**), a group of privately held North American mining industrial and transportation businesses, acquires Ekati as part of a ~US\$1.2bn acquisition of Dominion
- **March 2020:** Ekati is placed into care and maintenance in response to the COVID-19 pandemic and major disruptions in the global diamond trade
- **April 2020:** Dominion files for insolvency protection under the Companies' Creditors Arrangement Act
- **February 2021:** ACDC acquires Ekati with associated assets and liabilities from Dominion and mining operations recommence at Ekati
- **March 2023:** Burgundy announces the proposed acquisition of the Arctic Companies
- **July 2023:** Burgundy acquires the Arctic Companies and becomes operator of Ekati

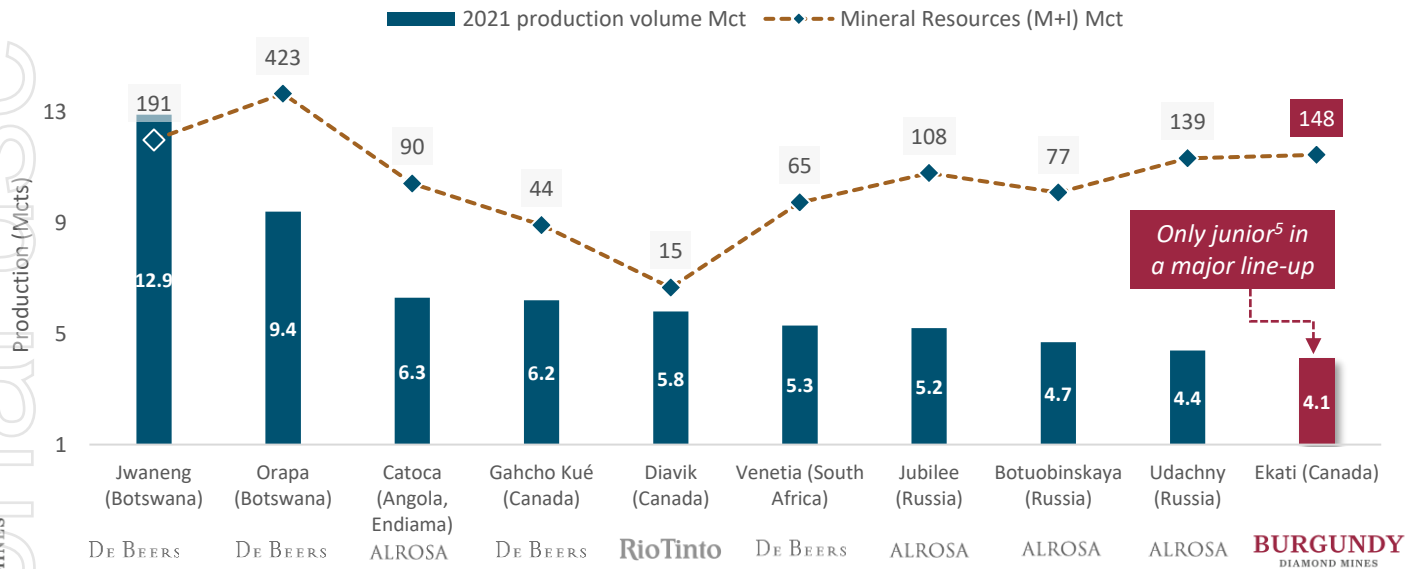

¹Notes: (1) On the historical claim block (2) Including purchase price adjustments of US\$53m.

Tier 1 asset of global significance

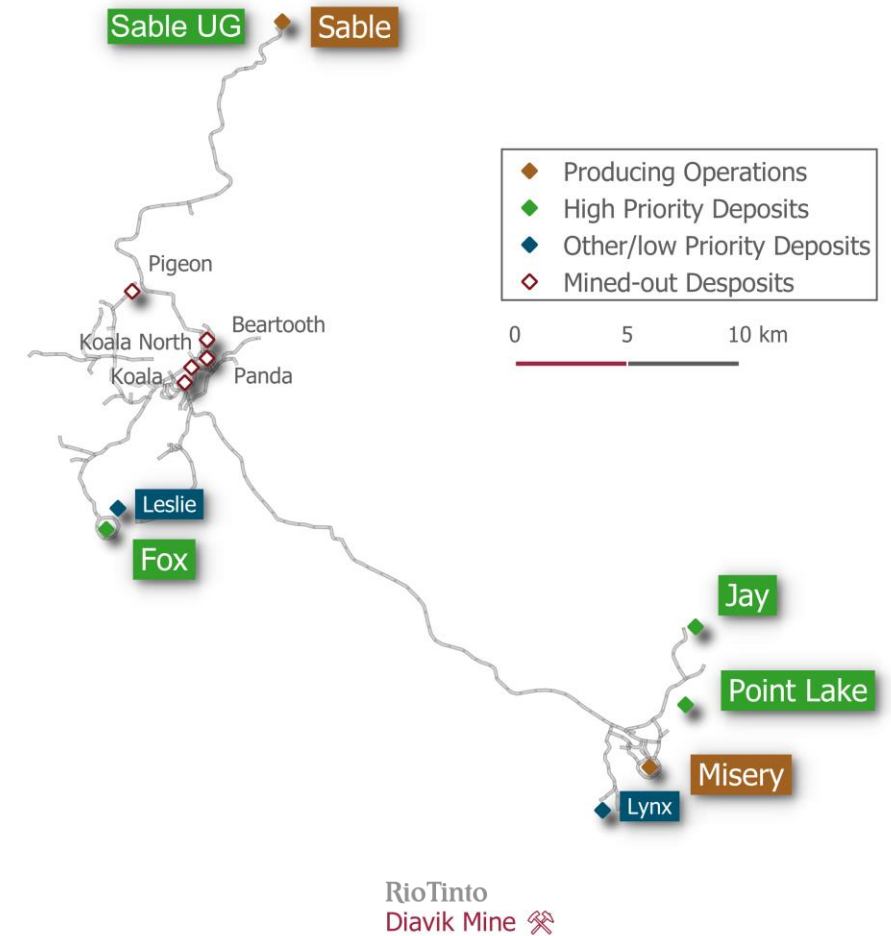

Asset highlights

- ✓ Top 10 diamond mine globally based on production carats recovered in 2022
- ✓ Top 3 diamond mine globally based on Mineral Resources¹
- ✓ In 2022, 4.2 Mcts were sold from Ekati, delivering US\$494m in revenue and US\$200m in adjusted EBITDA²
- ✓ First and longest running diamond mine in Canada with viable mine life extension options

Global rank (2021 production volume³ and Mineral Resources⁴)

Ekati mining deposits

Notes: (1) Measured and Indicated Resources only. (2) EBITDA is defined as net profit after tax before the deduction of interest expense and finance income, taxes, depreciation and amortisation. Adjusted EBITDA is defined as EBITDA adding back unrealised foreign exchange losses, a fair value adjustment on consideration payable for future royalty distributions and asset impairments. (3) 2022 production volume has been used for Ekati because this represents the first full year of production since the recommencement of operations in February 2021. (4) The Mineral Resource (inclusive of Proven and Probable Ore Reserves) profiles of each mine is based on the latest publicly available information and Paul Zimmisky research. Orapa (2021), Jwaneng (2021), Catoca (2017), Udachny (2018), Ekati (2022), Venetia (2021), Jubilee (2018), Botuobinskaya (2018), Gahcho Kué (2021), Diavik (2021). See Appendix for more details. (5) Mountain Province (also a junior) have a 49% non-operating interest in Gahcho Kue.

Access and infrastructure

Ekati is supported by a **robust infrastructure framework**

Access – winter ice road

- Road access to Ekati is by winter ice road that is seasonal in nature
- The ice road is ~475km long, constructed largely (~86%) across lakes and connects from the permanent all-weather road to the main Ekati complex via the Misery haulage road
- Open ~8 weeks per year, from February until the end of March
- Fuel, large equipment and heavy consumables are freighted to site on the winter road

Access – air transport

- Ekati has an all-weather gravel airstrip that is 1,950m long
- Airport equipped with runway lighting and approach system, navigational aids, radio transmitters and weather observation equipment
- General and light freight, fresh produce, and equipment is flown to the site year-round

Infrastructure

- Primary facilities at Ekati include:
 - main accommodation complex consisting of 763 sleeping rooms, dining, kitchen, first aid station, emergency response / mine rescue stations and maintenance shops;
 - power plant;
 - processing plant and bulk sampling plant; and
 - truckshop / warehouse complex

Ore Reserves and Mineral Resources

Ekati's mine life and extension options are underpinned by **Ore Reserves of ~26 Mcts** and **Mineral Resources of ~148 Mcts¹**

Section 4: Operational update

Strong operational performance

Ekati has **recovered 9.6 million carats** since operations were restarted in February 2021

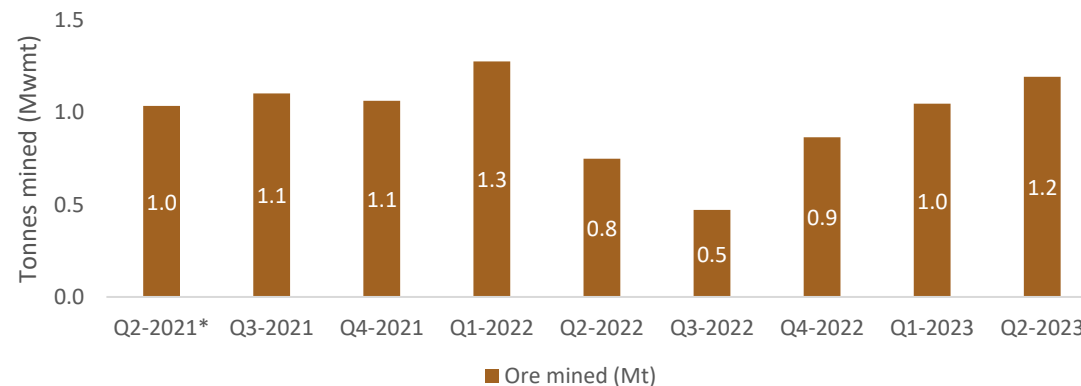

Commentary

- Ekati operated continuously until March 2020, when COVID-19 prompted the previous owner Dominion to temporarily suspend operations
- Following a 10-week phased restart program, Ekati recommenced operations in February 2021 (**Mine Restart**)
- There are two active mining operations at Ekati, including Sable Open Pit and Misery Underground operations
- Since the Mine Restart in February 2021 until the end of Q2-2023, Ekati has:
 - mined 46.1 Mwmt waste and 8.8 Mwmt ore, processed 9.3 Mdmmt, recovered 9.6 Mcts

2023 H2 review: tracking well ahead of schedule for 2023

Notes: (1) The variance calculation based on the figures set out in this table may differ due to rounding.

*For the period 3-Feb-21 to 30-Jun-21 in accordance with the Mine Restart.

Section 5: Mine life additions

Adding to a robust mine plan

Sable Open Pit and Misery Underground to deliver most of the production at Ekati until 2025 when Point Lake becomes active

Base mine plan

- Ekati's current mine plan is underpinned by Ore Reserves of 15.8 Mcts¹
- Two active mining operations at Ekati being the Sable Open Pit and Misery Underground operations
 - Sable Open Pit is a 60,000 ton per day (tpd) operation (using conventional truck and shovel)
 - Misery Underground operation utilises a sublevel retreat mining method at a nominal mining rate of 3,000 tpd
- Point Lake open pit development is underway (dewatering followed by pre-stripping) to deliver ore by 2025

Future additions to the base mine plan

- Four conventional mine life extension options are currently under investigation:
 - Misery Underground continuation at depth
 - Sable Underground following open pit completion
 - Expand Point Lake open pit beyond existing footprint
 - Fox Underground option below the existing open pit
- Since acquiring Ekati, Burgundy has initiated work to evaluate these mine extension options, comprising:
 - conceptual studies, optimisation and cost reduction strategies; and
 - geotechnical and resource drill program planning
- Burgundy is also examining ways for underwater remote mining technology to extend mine life

	Point Lake	Sable UG	Fox UG	Jay
Ore Reserves (Mcts)	5.6	-	~10	-
Mineral Resources (Mcts)	~24	TBD	~17	~90

Notes: (1) As at 31 December 2022 (excluding Fox Underground). (2) Forecast from 1 January 2023 based on Ekati's 2023 base mine plan.

Technology generated exploration

Re-exploring a highly endowed kimberlite field with a novel and successful approach

Commentary

Although Ekati has a sufficient level of existing Mineral Resources and Ore Reserves on the property, a number of compelling exploration targets have been generated through **deep machine learning**

Exploration review was completed in Q2-2022 based on the results from deep machine learning:

- 11 drill targets were identified and five were prioritised;
- helicopter supported exploration drilling of prioritised targets were completed in Q3-2022 and two of three targets drilled were confirmed as kimberlite pipes ('Badger' and 'Bear'); and
- follow up delineation drilling on the Bear kimberlite confirmed a similar pipe infill to known economic deposits and reasonable size potential

Additional prioritised targets are **being tested summer 2023**.
